EDUCATION

Simon Fraser University

BSc, Data Science Major, Computer Science Minor

Burnaby, BC

September 2021 – June 2025

- Department of Statistics and Actuarial Science Award recipient: March 2024

TECHNICAL SKILLS

Languages & Cloud: Python, R, SQL, MATLAB, HTML, CSS, Javascript, Azure

Frameworks: Django, React, Node.js, Firebase, Pytest, PyTorch

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Linux/Unix, MS Office, Confluence, Power BI, Tableau, Google Analytics 4

Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, PySpark, Seaborn, SciPy, Hadoop

Skills: Data Structures & Algorithms, Object-Oriented Programming, Software Testing & Debugging, Version Control, ETL/ELT, & Big Data Processing

WORK EXPERIENCE

Ocarina Studios

Data Analyst

Burnaby, BC

January 2025 – April 2025

- Implemented **end-to-end Python ETL/ELT** pipelines for data ingestion, transformation, modelling, and visualization, replacing manual Excel workflows and improving reporting efficiency.
- Performed **time-series modelling** to estimate customer lifetime value (CLTV) and forecast churn rate trends, informing marketing budget allocation decisions and enhancing data literacy.
- Optimized **SQL queries** using advanced joins and aggregations across marketing datasets, removing duplicate and inconsistent records and improving reporting accuracy by **60%**.
- Developed interactive **Tableau** dashboards for **5+ stakeholders** by analyzing marketing data from **Google Analytics 4** and translated findings into actionable insights.

Statistics Canada

Statistics Analyst Intern

Montreal, Canada (Remote)

January 2023 – August 2023

- Developed and deployed a Python-based data storage implementation on **AWS Azure** by streaming large datasets to benchmark speed, scalability, and memory usage across multiple formats; completed and presented results within **2-weeks** and cut costs by **40%**.
- Enhanced an address parsing tool using string processing and pattern detection in **Regex**, identifying **365,000+** incorrect address formats and improving overall parsing accuracy.

VOLUNTEER EXPERIENCE

Data Science Student Society

Director of Events

Burnaby, BC

April 2022 – April 2025

- Elected as Events Director with **61.3%** of votes in a departmental election, leading planning and execution of Data Science focused events for students.
- Organized **5+** technical events and workshops, including industry discussion panels and hackathons, connecting students with professionals and increasing engagement within the department.

PROJECTS

Electric Vehicle Adoption Prediction: Machine Learning on ICBC Vehicle Data | Python, Git, Power BI

- Led development of an ML model using a **RandomForestClassifier** to identify key predictors of electric vehicle ownership from **10,000+** records; built end-to-end Python pipelines for cleaning, transforming, and feature-engineering data with **Pandas/NumPy** and **Scikit-Learn**, achieving **87%** predictive accuracy.

Predicting Song Replays in Music Recommendation Systems with Influence Analysis | Python, Tableau

- Lead data engineer on a 3-person team**; built Python pipelines (Pandas/NumPy) to clean, transform, and merge song and user data from the KKBOX Music Recommendation Challenge into a unified CSV output, adding to workflow efficiency.
- Conducted influence analysis using leave-one-out and group-influence methods, and developed **Tableau** visualizations to identify influential songs and source types driving recurring engagement from listeners.
